

The Vyllage House

from MicroTactix Games
www.microtactix.com

DISCLAIMER

We have made every effort to make sure that all parts fit together properly, but sometimes tolerances are tight and mistakes do happen. Test fit all pieces before applying glue. Some trimming may be required.

Before photocopying or printing these pages on cardstock, you may wish to assemble a test copy on plain paper to better understand the construction. A minimum of 65# cover stock is recommended for constructing the final models. Regular 20 lb. bond paper can be used, but these items were designed for a heavier stock for extra durability and coloring.

Tools Required:

Scalpel or sharp-bladed hobby knife

Metal ruler or straight-edge

Cutting surface - a self-healing cutting mat is recommended, but a sheet of corrugated cardboard or even heavy poster board will work as well.

Glue - white glue, glue stick or wax stick. Double sided cellophane tape also works well. Rubber cement can be used, but will sometimes stain the cardstock or make it more difficult to color.

A Note About Using White Glue

White glue contains a good deal of water. Too much glue will warp the card stock so that its almost unusable. Warping may also cause the parts to fit together incorrectly. If you use white glue, put a very thin coat on the glue tabs - the thinner the better. You can use a cotton swab or your finger to spread the glue thin. Remember to keep a damp paper towel handy to remove any excess glue.

PLEASE NOTE:

Each item has been marked with a series of Grey Lines that are an indicator that these lines are Fold or Score lines. All Tabs which are to be glued to hold the structures together are marked with a capital letter (G). Unless otherwise noted, all Glue Tabs fold inwards to the structure.

Cut out and score all the elements on this page. Glue the two halves of the house together and fold into a box, gluing the tabs to the inside. Fold over the upper rear wall and the tab glue to the inside. Fold the roof in half, fold down all tabs along the top of the building, apply glue and attach the roof, making sure it is centered on the building. Fold up the tab at the top of the rear roof. Fold down all tabs on the lower story and apply glue. Fold the tab at the top of the rear roof and apply glue. Attach the roof to the lower story and place the tab on the lower story roof to the inside of

the back wall on the upper story. To construct the chimney, fold into a box and glue the tab to the inside. Fold down all tabs along the top edges, apply glue and fold down the top of the chimney in place. Fold up the tabs on the bottom edges of the chimney, apply glue and place on the roof as desired.

The finished Vyllage House.

See our Vyllage Color Preview Set, an exclusive set of four all-new buildings that will give you a taste of the detail and beauty of the newly-redesigned color version of the Vyllage-on-the-Cheep! Fans of the old Vyllage will be amazed at what color and additional detail have added to the Vyllage experience. New fans will fall in love with the versatility and value of these great scenics. Best of all, these sets sell for AMAZING low prices! Get the Vyllage Color Preview Set for only \$5, and each of the six new core Vyllage sets plus the Vyllage Folks figure set for only \$6 each! The entire thing will cost little more than the original black-and-white Vyllage did when it was released!

Watch for the release of each new set, and celebrate with us the full-color rebirth of the product line that created the cardstock buildings craze, and heralded the start of the MicroTactix line of products. The Vyllage-on-the-Cheep is brighter, better and more all-around useful than ever -- but it's still... well... cheep!
